DETAILED ACTION

1. Claims 1-25, 30, 34, 36 have been cancelled by Applicant.

Specification

2. The amendment filed 2/20/2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: in claims 51-54, the newly added claim language "and further contains transition metals".

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 51-54 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention for the reasons stated above in the objection to the amendment filed 2/20/2007 under

Art Unit: 1773

35 U.S.C. 132(a). The disclosure as originally filed fails to provide support for the newly added recitation of "further contains transition metals", which appears to require the presence of one or more transition metals (as distinguished from transition metal oxides).

Allowable Subject Matter

5. Claims 26-27 and claims 28-29, 31-33, 35, 37-50 (as dependent on claims 26-27) are allowable over the prior art of record.

6. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to disclose or teach biaxially oriented polymer films containing transition metal oxide particles: (1) having the recited difference in T_m between a first and second measurement (claims 26-27).

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1773

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
